Examiner's Comment Regarding Requirement for Deposit of Biological Material	6. ☐ Interview Summ Paper No./Mail 3), 7. ⊠ Examiner's Ame	Date

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Rogitz on August 3, 2006.

2. The application has been amended as follows:

Please cancel Claims 9-10 and 30-45.

Claim 11:

In line 2, "the logic including:" has been changed to --the logic being stored on a computer readable medium and executable by the digital processor to implement a method including:--

In line 9, "microphone position signal; and" has been changed to --microphone position signal;--

In line 11, "head orientations to respective gain adjust percentages." has been changed to --head orientations to respective gain adjust percentages; and

at least in part using the gain adjust percentages, establishing an audio gain of the audio system.--

Claim 12:

Application/Control Number: 09/757,012 Page 3

Art Unit: 2615

ĩ

In lines 2 and 3, "a microphone, or an orientation of a person's head relative to the microphone." has been changed to --a microphone.--

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: The general concept of deriving a person-microphone signal using a video stream and using the person-microphone position signals to generate audio gain adjust signal, wherein the audio gain adjust signals are utilized to establish a gain of the audio system was well known in the art at the time of the invention. However, the examiner has not found prior are that teaches or suggests alone or in combination deriving person-microphone position signals using a video stream which is representative of at least one person and at least one microphone and using the person-microphone position signals to generate audio gain adjust signals, wherein the audio gain adjust signals is determined based at least partially on an orientation of a person's head relative to the microphone and recording at least one calibration person-microphone position signal and at least one calibration audio level to use the calibration signal and calibration level to generate at least one mapping correlating head orientations to respective gain adjust percentages in order to use the gain adjust percentages to establish an audio gain of the audio system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Corey P. Chau whose telephone number is (571)272-7514. The examiner can normally be reached on Monday - Friday 9:00 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chin Vivian can be reached on (571)272-7848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
